32% more larger effective hitting area!
The Isometric head shape, an original YONEX development, equalizes the length of main and cross strings in the stringbed racquets, giving control players a 32% larger effective hitting area than a conventionally shaped racquet. These racquets provide a consistent response for more effective hits even on shots that are off-centre.

STRINGING MACHINE

YONEX INTERNATIONAL STRINGING TEAM

ESSPRO
ELECTRIC BADMINTON & TENNIS STRING MACHINE
Size: 940X540X1,025~1,200mm
Weight : 50kg
Made in Japan

No. 1 in reliability

Used by the YONEX International Stringing Team and trusted by the tournament pros, the YONEX ESSPRO Stringing Machine delivers world-class reliability. Multi-voltage performance across from 85V to 265V enables accurate stringing operations worldwide. Four separate systems support reliable start-up operations and dual backup systems for control operations keep players and the tournament schedule progressing smoothly.

- Four systems for starting operations ensure maximum stringing uptime all the time.
- Two control systems with seamless mode-to-mode switching ensure flexible and reliable on-site stringing operations.
- 85V to 265V multi-voltage performance gives the YONEX ESSPRO Stringing Machine all-venues use.
- The ESSPRO Stringing Machine's String Clamp Base provides convenience on top of highly-stable stringing performance.
